StagVision

What is the Problem?

Incomplete data: Stagwell and its agencies boast hundreds of awards. However, this data is currently incomplete and tracked manually and inefficiently, making it difficult to derive actionable insights

Ineffective award flywheel: Stagwell's agencies submit thousands of award submissions a year, estimated to total over **\$2.5 Million** in fees per quarter...Yet, our conversion rate is still the industry average, ~ 15%

Without a complete archive, we are not empowered to make strategic decisions about where to invest in brand visibility

We can do better.

The current method:

Stagwell Network Awards Tracker:

Year	Show	Award	Category	Client	Stagwell Agency Credit	Source	Work
2006	2006 15th Annual Shorty Awards	Silver	Brand Partnership	Stag Cold Brew	Hunter	N/A	Stag

2034	2034 18th Annual Webby Awards	Winner	Apps & Software - Marketing and Content Ma	N/A	Phiophet	N/A	N/A

Award submissions costs:

EX: [Cannes Lions submissions](#) range from \$650 - \$2680 per category

In Q2: 276 Award Wins / 1840 Award Submissions = **15% Conversion Rate**

Award Submissions * \$1500 (Average cost per submission) = **Over \$2.5 million Spent on Award Submissions per quarter**

Bottom line remains:

We need a tool to more efficiently enhance Stagwell's brand visibility, analyzing data to:

1. Identify which awards are worth investing time/resourcing in
2. Sharpen award submissions with predictive insights drawn from past award wins to ensure that this expenditure is driving ROI

Introducing...

How It Works: Predictive Awards Planning Tool

Our AI Solution:

StagVision streamlines the process of generating award submissions and gauges effectiveness, helping companies save time and focus on what matters most—driving brand success.

1. Tracks Stagwell's award wins, identifying the key award shows that have the highest win rates and will best enhance brand visibility
2. Reviews award submissions, providing **conversational feedback** on how to refine language and offers predictive insights into the categories where this submission is most likely to succeed

StagVision Bot:

StagVision Bot scrapes:

1st Party Data:

- Coverage Tracker
- Award Submissions
- Information on the agencies' core capabilities

3rd Party Data:

- Award show guidelines
- Web content with commentary by award reps and jury

How to Build StagVision – Insights from Aaron Kwittken, CEO and Founder PProphet

Step 1: Gather Data

Incentivize award shows to grant StagVision permission **access to their data**, by demonstrating:

- StagVision will **improve the quality of award submissions** (judges want this!)
- As the predictive AI recommends their award show to users, StagVision will **increase the number of submissions shows receive**
→ Increases revenue

Step 2: Normalize Data

Ask a data scientist to create a uniform database to **normalize the data**

- Identify the common success factors among winning campaign submissions
- Deduce the type of language that increases the chance of winning

Step 3: Build a Business Model

Monetize the tool with a **monthly subscription model**

Step 4: Create User Stories

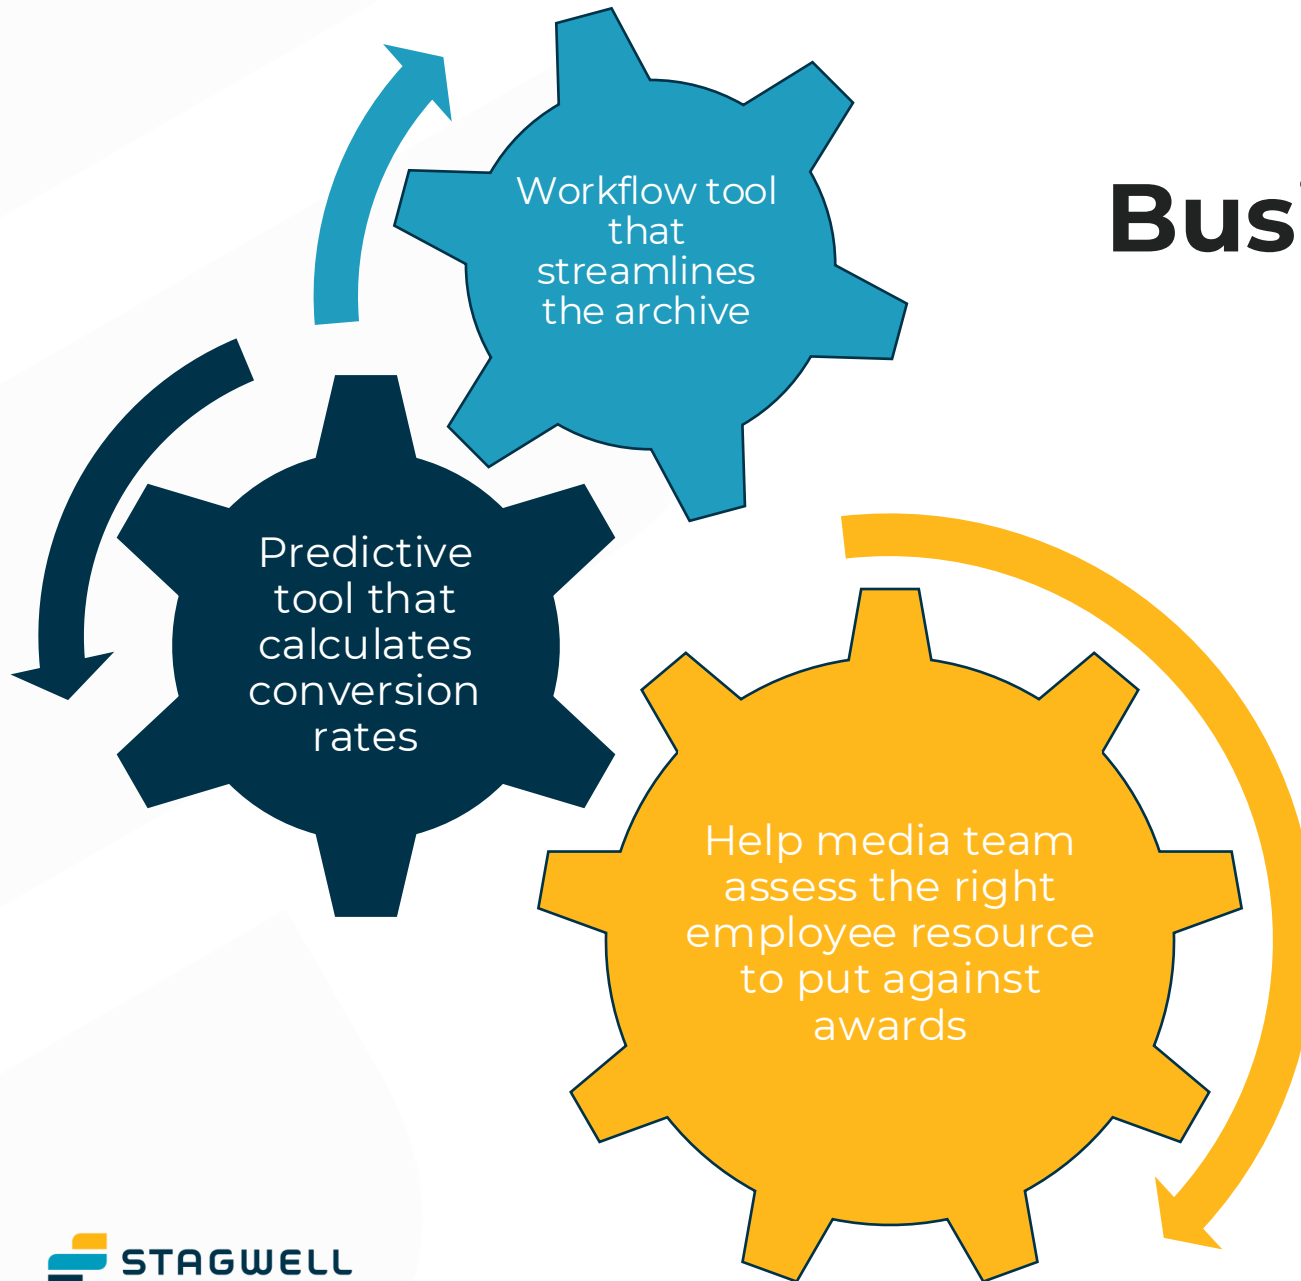

Design the steps a user takes to navigate around the tool

- How do users prompt the tool?
- What does the interface look like?

How much will it cost to build StagVision?

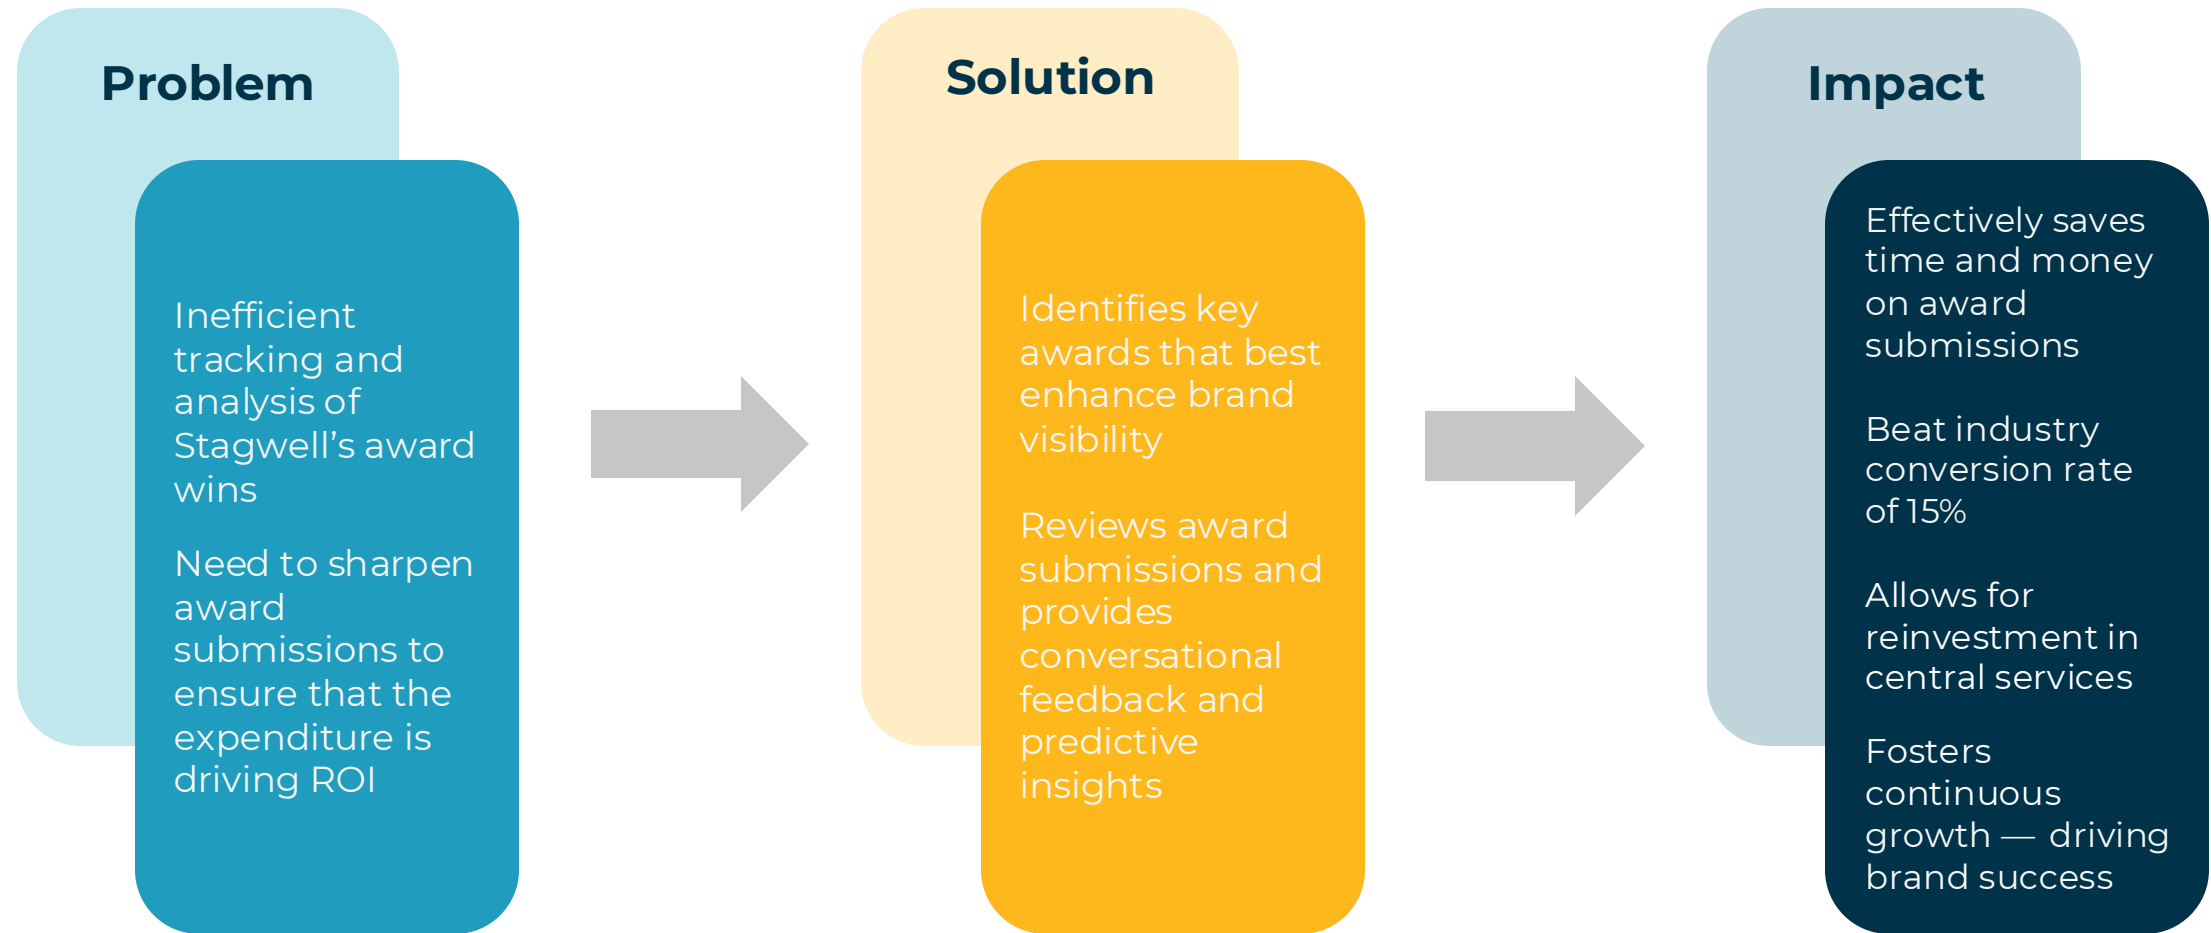

\$700,000 - \$800,000

Business Impact

- **Predictive Insights:** StagVisions' predictive analytics and conversational modification function enhance submission quality and relevance
- **Strategic Investment:** Optimize annual expenditure on awards submissions by maximizing ROI
- **Cost Reduction:** By targeting the most effective awards, reduce unnecessary submission fees and ensures higher conversion rates, lower overall cost per win
- **Operational Efficiency:** Automated data analysis reduces manual tracking and data entry, saving time and labor resources
- **Enhanced Reporting:** StagVision can generate detailed and customizable reports to provide executive leadership with the specific insights they need

Why StagVision?

Investigation Process

Initial Research

Meeting with Brandon Dixon, who provided valuable direction and guidance from a Comms perspective

Interview with Shah Garibov, Prophet AI

Gather insights on existing AI tools and comments on feasibility
